

## CLARITY & FASTER RESPONSE TO PROTECT EMPLOYEES, LOCATIONS & ASSETS

**WHERE ARE EMPLOYEES & ASSETS?**

**WHEN DO I LOCKDOWN?**

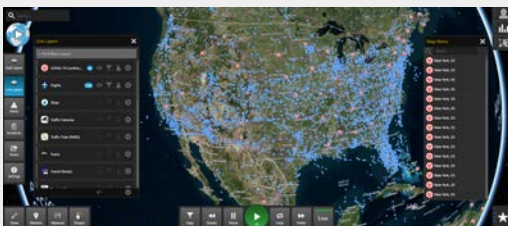

**HOW DO I KEEP EVERYONE SAFE?**

Real-time data driven decisions ensure the safety and security of your organization's most important assets. Security teams need the ability to gather data from all sources, and then correlate it in real-time on a common operational view, to take action immediately. Live Earth is a real-time common operating picture that provides data analytics and visualization tools on an intuitive, interactive map, to efficiently manage and reduce risks.

- See** what is happening in real-time across a variety of data sets.
- Decide** by leveraging alerts, analytics and historical analysis.
- Act** immediately with integrated sharing capabilities.

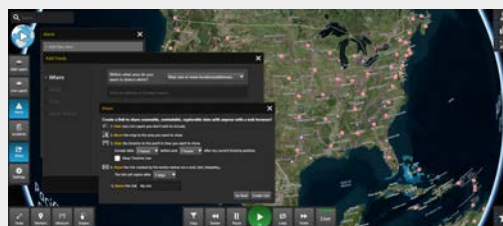

Live Earth was developed for complex, modern operational environments to easily extend with future data sources, regardless of vendor or format. It is hosted securely through AWS today, or hosted in a preferred cloud or on-site network.

### IMPORT YOUR DATA & CREATE GEOFENCES

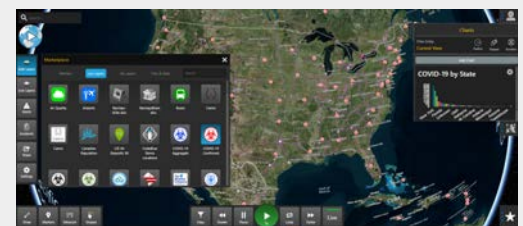

Import the physical locations of all employees, locations and assets. Highlight specific assets for greater awareness and increased focus.

### CREATE REAL-TIME ALERTS & EASILY SHARE

Configure alerts when reported cases come within a predetermined distance of assets. Easily share content out of the platform with images, links & videos.

### MONITOR YOUR DATA WITH CHARTS & ANALYTICS

Monitor the spread as it relates to your assets and other data sources. Create charts for analytics and insights to take action quickly.

## Analyze global patterns & trends coming from all events & data sources to make proactive decisions & plan for the future.

### Key Differentiators

- Synchronize operations across organizations and teams.
- Easy to deploy with minimal training required.
- Share data across your organizations and departments with ease.
- Faster decision making with real-time alerts, sharing functionality, an interactive map and more through a wide variety of features and tools.

### Software Agnostic

- Upload and ingest data from multiple data sources including files, sensors, systems and feeds.
- Integrate your feeds or use your preferred vendor with our API.
- Extensible platform grows and evolves with your organization, preventing vendor lock.
- Capitalize on a technology ecosystem built with industry leaders to manage, secure and enhance your real-time data.

### Key Integrations

- Internal Data Files
- Travel & HR Systems
- Global Intelligence Sources
- Risk Event Management
- Internal & External Sensors
- Video Management Systems
- Access Control
- Weather & Storms
- Traffic Flow
- Public Transportation
- Flights & Ships

- Live Data Streams
- Secure Cloud Archive
- Multi-Platform Viewers

Hybrid or on-site network options available.
